

I think satalite radio is the greatest. The music stations are fantastic. They play such a variety of music that I hardly ever want to play my compact discs in the car. It is hard to leave my car, because I am enjoying the music, sports, news, comedy and many other stations. The satalite radio is like being at home with your own entertainment center. I hate regular raido because they only play the same songs over and over. No rare music. Also you have to listen to so many irritating DJs who only want to hear themselves talk and too too many commercials. I strongly urge the FCC to reject NAB's petition 04-160 and just let things be. Stop trying to always try to control everything. Let us enjoy this system!!!!
